

**Health professionals who know their patients and who understand Prader-Willi syndrome provide the best treatment to their patients.**  
**Join our IPWSO Health ECHO!**

## Doing More for More Patients

IPWSO's mission in collaborating with the Project ECHO® initiative, is to unite the global Prader-Willi syndrome (PWS) community, to move knowledge, and to reach underserved populations.

Collectively we can find solutions to the challenges of the syndrome and we can support health professionals in their work and advocate for the needs of people with PWS, their families and PWS Associations.

***Together, we can help to build knowledge and centres of excellence in PWS across the world.***

The IPWSO Project ECHO® educational programmes currently include a Leadership, a Health and an SPW Latino American ECHO. These are designed to build capacity and expertise in PWS using the ECHO Model™ and an "all teach, all learn" approach. For more information on Project ECHO, visit <https://hsc.unm.edu/echo/>

This IPWSO Health ECHO programme will be of interest to a wide range of health professionals including: Geneticists, Paediatric Endocrinologists, Neonatologists, Nurses, Paediatricians, Endocrinologists, Psychiatrists, Psychologists, Social Workers, Occupational Therapists, Pulmonologists, Orthopaedic Surgeons, Dieticians, Physiotherapists, Speech and Language Therapists, Medical Students and Professional Caregivers.
