### **Because Hormones Matter**

What are they and how do they impact our lives?

#### How do hormones work?

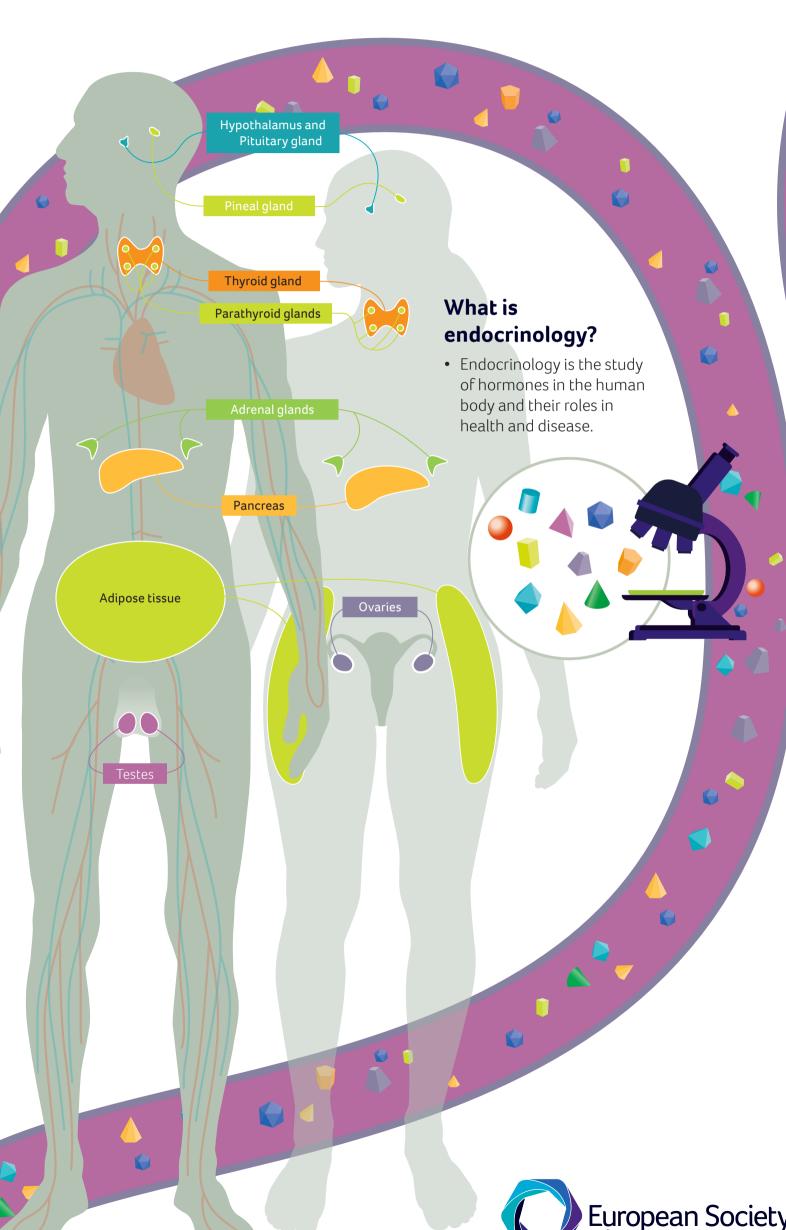

- · Hormones are biological messengers that travel throughout the body, telling our cells and organs what to do.
- · Hormones are essential.
- help us grow and mature
- cope with stress
- help us stay fit and healthy - manage our metabolism
- determine our
- sexual function There are many hormones, each with its

#### What are endocrine disorders?

and many more

- Endocrine disorders are caused and characterised by abnormal (too high / too low) hormone levels.
- Endocrine disorders include obesity, diabetes, thyroid disease, cancer, growth disorders, hypertension, osteoporosis, infertility and sexual dysfunction, and many rare diseases.
- More than three quarters of the population will need an endocrinologist at some point in their life.

## **Because Hormones Matter**

It is time to recognise the role of hormones in preventing, treating and living with some of the most prevalent diseases in the world.

#### Cancer

is the second leading cause of death and morbidity in Europe 1

Median survival of neuroendocrine tumours is

## 41 months

#### **POLICY ASK**

Strengthen the endocrine perspective and acknowledge endocrine cancers in the Beating Cancer Plan and Horizon Europe research calls.

#### per year per year ' More than

million

90,000 thyroid cancer per year "

million

cases

# **Obesity**

Those living with obesity have been found to have a life expectancy five years shorter than those with a "healthy" weight status V

In Europe,

new cancer cases are linked to

Overweight and obesity cause more than 1.2 million deaths acros the WHO European Region every year

In adults, a 5–10%

weight loss

may lead to health benefits

from decreasing obesity-

related comorbidities

Almost 10 of adults and nearly 13 children live with obesity or overweight in Europe

#### **POLICY ASK**

obesity

Recognise obesity as a chronic relapsing endocrine disease by all stakeholders at European and national levels, focus on prevention and develop new treatment options.

# **Endocrine Disrupting Chemicals**

1,500

### Between €157 and € 270 billion per year

in health care expenses and lost earning potential in Europe

Implement all legislation relevant to EDCs without any further delay to ensure a more healthy and sustainable European society for the current as well as future

# **Rare Endocrine Diseases**

Rare diseases affect approximately

million

rare diseases are related to the endocrine system <sup>13</sup>

Rare diseases are often chronic and life-threatening. Key issues to address are:

late diagnosis

 need for access to expert centres • many diseases have no cure

#### **POLICY ASK**

Allocate the resources to mature the critical role of the European Reference Networks, drive the development of registries and innovation in diagnosis and treatment.
