

ESE's Vision

Shaping the future of endocrinology to improve science, knowledge and health.

ESE's Mission

It is our mission to advance endocrinology. We unite, support and represent our specialty, promoting collaboration and best practice, and enable our community to develop and share the best knowledge in endocrine science and medicine.

ESE, the voice for endocrinology

ESE Strategy 2022-2026

PILLAR ONE: To UNITE and REPRESENT the European endocrine community and be acknowledged as the reference point for endocrine health and science.

- Improve the definition, position and visibility of endocrinology in the healthcare and research landscape.
- Work together with other endocrine societies to address inequalities in education, clinical care and health policies.
- Influence and contribute to the development of health policies by alliance building and extended representation in European health structures.
- Foster an engaged and collaborative approach with specialist societies in endocrinology and allied areas.
- Strengthen the patient voice through engagement with Patient Advocacy Groups.
- Develop a strong network of endocrine centres for research and educational collaboration.
- Maintain and build on strategic partnerships including international societies, industry partners, and other stakeholders.
- Increase public awareness of endocrine health and disease.

PILLAR TWO: To SUPPORT our members in education, clinical practice and research.

- Provide a strong membership value proposition.
- Develop supportive, responsive and effective communities within our Society to meet the needs of our audiences.
- Improve the member experience through the development of a comprehensive digital interface.

- Further develop high quality and continuous education and training for all career stages.
- Focus on continuous development of the European Congress of Endocrinology to maintain its position as the key meeting place for endocrinology.
- Support broader complementary career skills for all members.
- Provide a dedicated focus to support the research community.

PILLAR THREE: To further ADVANCE the science and clinical care of endocrinology.

- Further develop our guidelines programme and other position papers through more collaboration with other organisations.
- Develop the European Board Examination on Endocrinology, Diabetes and Metabolism towards common accreditation standards across Europe, and increase acceptance at the national level.
- Develop new educational programmes for target audiences and regularly review the ESE Curriculum of Specialisation to keep it up-to-date.
- Maintain, grow and leverage the quality, reputation and impact of the European Journal of Endocrinology and Endocrine Connections and evaluate additional publishing opportunities.
- Further develop our engagement in research initiatives, including partnership on selected European research consortia.

PILLAR FOUR: To reinforce ESE as a leading society which is SUSTAINABLE, TRUSTED AND VALUED.

- Build skills and capacity in areas of strategic importance.
- Achieve and maintain diversity across our activities, structures and team.
- Ensure we are equipped to be proactive, innovative and agile in our response to new opportunities and challenges.
- Develop a digital infrastructure which enables our long-term objectives.
- Set high standards and goals related to environmental sustainability.
- Secure our long-term financial sustainability.
