Because Hormones Matter

It is time to recognise the role of hormones in preventing, treating and living with some of the most prevalent diseases in the world.

leading cause of death and morbidity in Europe 1

Median survival of neuroendocrine tumours is

41 months

cases

per year

per year

More than

thyroid cancer per year

POLICY ASK

Strengthen the endocrine perspective and acknowledge endocrine cancers in the Beating Cancer Plan and Horizon Europe research calls.

Endocrine Disrupting Chemicals

Between €157 and € 270 billion per year

in health care expenses and lost earning potential in Europe

POLICY ASK

Implement all legislation relevant to EDCs without any further delay to ensure a more healthy and sustainable European society for the current as well as future generations.

Obesity

Those living with obesity have been found to have a life expectancy five years weight status ^v

In adults, a 5-10% weight loss

may lead to health benefits from decreasing obesityrelated comorbidities

In Europe, 200.000

new cancer cases are linked to obesity per year

Overweight and obesity cause more

than 1.2 million deaths across the WHO European Region every year

, ^^

Almost 10 of adults and nearly 3 children live with obesity or overweight in Europe

POLICY ASK

Recognise obesity as a chronic relapsing endocrine disease by all stakeholders at European and national levels, focus on prevention and develop new treatment options.

Rare Endocrine Diseases

Rare diseases affect approximately

related to the endocrine system^{ix}

Rare diseases are often chronic and life-threatening. Key issues to address are:

> late diagnosis need for access to expert centres many diseases have no cure

POLICY ASK

Allocate the resources to mature the critical role of the European Reference Networks, drive the development of registries and innovation in diagnosis and treatment.
